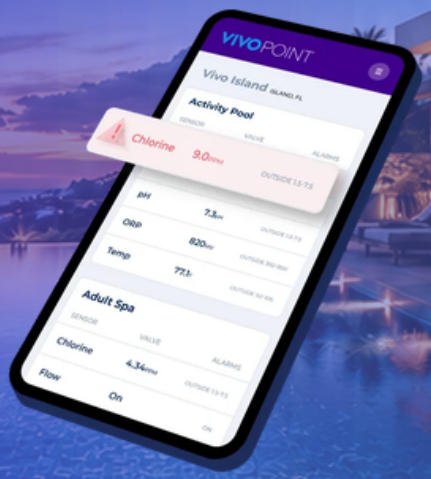
VIVOAQUATICS

VivoPoint

Monitor water safety and automate compliance from any device, in real-time. Achieve the best guest experience with the industry leading, water management platform.



VivoPoint is VivoAquatics' award-winning intelligent water management platform. It pairs cloud software with IoT sensors and chemical controllers to give engineering teams real-time visibility into every body of water. Daily readings and alerts become one clear, auditable record across a single property or an entire portfolio.

KEY CAPABILITIES

Portfolio Oversight

See every property from one dashboard. Track chemistry, equipment, and service across your whole portfolio, with analytics to surface trends.

Notifications

Catch problems before they become closures. Get flagged the moment a reading falls out of range.

Blu — AI Assistant

Your on-demand water expert, trained on curated insights from the VivoAquatics team. Ask Blu, upload a photo, or click Resolve on any alarm for exact steps.

Service Orders

Keep every job on track. Create a request, update status, review history, and chat through it until it's closed. Nothing gets lost.

Sustainability Monitoring

See what your facilities consume. Track water through connected meters and energy through your VFDs, so you can spot waste and run leaner.

Expert Support

Answers when you need them. Dig into a built-in knowledge base, or reach the industry veterans on our support team via chat in VivoPoint.

Reports

Export readings and water safety scores to prove compliance and keep ownership in the loop — and track items like CPO certs and ADA lifts.

Equipment Logs

Know exactly what's at each property. Log every piece of equipment with its specs, warranty, and install info — details there whenever you need them.

"The benefits are I can sleep at night knowing that I have onsite monitoring in case anything goes wrong with chemical balances, I will know immediately instead of in the morning when I get into work."

Alan Otlo · Director of Engineering, St. Regis Deer Valley

MANAGE EVERY BODY OF WATER FROM ANYWHERE

When you need to answer a health inspector or update corporate, VivoPoint puts the analytics and documentation you need in one cloud platform. Reach it from any device, day or night.

- **Safety, 24/7.** Automated oversight of manual and controller readings means problems surface immediately, not the next morning
- **Effortless compliance.** Reports and work orders on demand for audits and inspections
- **Energy and resource savings.** Sub-metering and leak detection cut waste and extend equipment life
- **Team-ready.** New and current staff pull the expert guidance they need straight from the VivoPoint knowledge base.

MEET BLU YOUR ON-DEMAND WATER EXPERT

Your on-demand water expert, trained on curated insights from the VivoAquatics team. Ask Blu, upload a photo, or click Resolve on any alarm for exact steps.

TRUE PARTNERSHIP

Increased savings across the board

- **20%** Savings in Water Usage
- **26%** Savings in Labor Costs
- **31%** Extension in Equipment Life
- **20%** Savings in Chemical Cost

"VivoPoint makes your data usable. The graphs, the insights, the visibility—it's a game-changer."

Jeremy Stiles
VP of Risk Management,
YMCA of Greater Boston

"If I didn't have VivoPoint, I'd spend my entire day manually walking to all 29 pools and spas, starting over again every four hours."

Robert Barth
Pool & Spa Operator,
Resorts World Las Vegas
